Fox Lea Farm Venice Equestrian Tour Biosecurity Protocols January 27-March 6, 2015:

Fox Lea Farm is dedicated to the health, welfare and safety of all exhibitors both equine and human. To protect our equine partners, we will be enforcing the following protocols at all of our events this year.

- . 1) A current negative Coggins test is required. It is strongly recommended that all horses be vaccinated for Equine EHV-1 (either modified live or killed vaccine) no sooner than 7 days prior and no later than 90 days prior to entering the show grounds. Most EHV-1 vaccines are only considered effective for 90 days. Check with your veterinarian about which vaccine you should use.
- . 2) A Health Certificate must be signed by a licensed veterinarian within 30 days of arrival at the show or whatever local state law requires.
- . 3) Vaccinations per USEF GR 845.
- . 4) You should be able to document your horse's normal temperature before arrival. Please do not ship horses with elevated temperatures. It is recommended that you establish a log of temperatures taken at least twice daily. If there is an elevated temperature for more than a 24 hour period, please consult your local veterinarian immediately.
- . 5) Every effort should be made to minimize stress and commingling of horses shipped long distances. Extra hours on a horse van, or moving from stable to stable is the fastest way to compromise your horses and the health of your neighbors' horses.
- . 6) Any horse on the show grounds with a fever of unknown origin or of suspicious origin must be reported to Show Management and to the Show Veterinarian. It is always better to err on the side of safety. Isolation stalls will either be available on the grounds or at a local veterinary practice if the need arises.
- . 7) Please take the time to review equine good hygiene practices. Please convey the importance of this to your equine caretakers for their daily routines.

Fox Lea Farm strives to provide a safe and enjoyable show experience. An important part of that experience is maintaining healthy horses. Please continue to check our web site at www.foxleafarm.com for any additional and possibly mandatory requirements.

Documentation should consist of one of the following methods mentioned below. The frequency of vaccine administration should be per the vaccine manufacturers' or veterinarian's recommendations. It is recommended that vaccines are administered by or under the direction of a veterinarian. 2. In the case of vaccines administered by a veterinarian, the exhibitor, upon request by Competition Management, must provide documentation from the veterinarian on documenting that the horse in question received the vaccinations; name of the vaccines and date of vaccine administration. 3. In the case of vaccines administered by a person other than a veterinarian, the exhibitor, upon request by Competition Management, must provide a receipt of the vaccine purchase which is signed by the owner, or agent with care, custody, and control of the horse; name, serial number and expiration date of the vaccine; and date of vaccine administration. 4. In the case of a horse that is unable to receive either of the vaccinations due to a history of adverse reactions, the exhibitor, upon request by Competition Management, must provide a letter from the veterinarian on official letterhead stating that the horse in question cannot be vaccinated due to medical concerns and a log of temperatures taken twice daily for the seven days prior to entering the competition grounds. These horses must also have their temperature taken and logged twice daily while on the competition grounds.
